Advanced & Mixed Conversation Class

1. Warm-up (10 min)

Quick question to break the ice:
“If you had unlimited power for one day, what would you change in the world, and why?”

2. Reading Text (15 min)

Topic: Artificial Intelligence and Human Identity

Artificial Intelligence has become ubiquitous in modern society, shaping the way we work, communicate, and even think. However, as machines become more human-like, we face an ethical dilemma: what does it mean to be human? Some argue that overreliance on AI may weaken our critical thinking, while others see it as an opportunity to strengthen the societal fabric. Yet, AI systems can carry bias, reflecting the flaws of their creators.

3. Vocabulary (10 min)

- Ubiquitous: present everywhere
- Ethical dilemma: moral problem with no clear solution
- Overreliance: excessive dependence
- Societal fabric: structure of society
- Bias: prejudice or distortion

4. Critical Debate Questions (25 min)

- Should artificial intelligence be given rights similar to humans? Why or why not?
- Do you think technology is making us more connected or more isolated?
- How would education change if AI replaced teachers?

5. Role-play (20 min)

Scenario: A government is debating whether to allow AI robots to vote in elections.
- Group A: In favor
- Group B: Against
Each group prepares arguments and debates.

6. Real Problem + Pair Discussion (20 min)

Imagine you are the CEO of a tech company that created an AI capable of reading basic thoughts.
- What would be the risks?
- How would you convince the public it is safe?
- What laws should exist to regulate it?

7. Structured Debate (20 min)

Topic: “Technology improves society more than it harms it.”
- Half the class: positive side
- Other half: negative side
- After 10 minutes, switch positions.

8. Wrap-up (10 min)

Each student answers:
“What is one thing you learned today that changed your perspective?”
